## Pump Centre

### Severn Trent Water mini conference

Last month, we ran our first mini conference of the year hosted by Severn Trent Water. The theme of our first conference was 'Improved pumped system performance' with the aim of exploring and developing an understanding of some of the key issues relating to pump selection and operation.

As always it was great to catch up with our members and discover the latest technologies and solutions they are providing for the water industry and we're looking forward to hosting our next one in June for Yorkshire Water.

### Registration is now OPEN!

After a triumphant return to face-to-face networking in 2022, one of the UK's leading water industry exhibitions, The Water Equipment Show, returns for 2023 with the biggest ever content programme to date.

The Water Equipment Show (WES), presented by the Pump Centre, is back at the International Centre, Telford on Thursday 11th May 2023. Everyone is eagerly anticipating the return of the hugely popular water industry event.

This highly anticipated water and wastewater industry event will host more than ninety exhibitors and almost thirty expert speakers, giving you the chance to solve critical challenges and see the latest developments from the biggest names across the water sector.

Don't miss out, register for your free place today

### Become a member

Over 50 million household and non-household consumers in England and Wales receive good-quality water, sanitation and drainage services daily.

Pump Centre members contribute in various ways to help the water industry deliver these services. We provide cost-effective help and support that helps our members to support their customers across the whole supply chain.

To find out more about our membership benefits, visit our website.

### Training courses

If you're looking to up-skill your workforce, why not enrol them on to one of our upcoming training sessions? The Pump Centre hosts a range of training courses, designed especially for those working within the water and wastewater industries. Become a member and receive a discount across all our training courses - don't miss out!

### Improve your business with historic data sets

Earlier last year, the National Infrastructure Commission, published four new charts with data stretching back to the 1960s and 1970s showing how water supply, metering, bills and investment have changed through the decades.

This new data is being presented, along with other data sets to show the long-term trends within the sector, allowing companies to build a more comprehensive picture of the UK's water industry.

Think your company would benefit from seeing this?

### Young Engineer Awards

It's that time of year again when we all have a part to play in highlighting tomorrow's talent. The shortlist is in, and interviews are underway - but who will win the coveted awards this year?

While there's no doubt that UK engineering needs more recruits, the quality of our Young Engineer Award candidates bears witness that there is plenty of ability among our recent apprentices and professionals.

Once again, the Pump Centre will celebrate this talent by hosting The Young Engineer Awards at our special members' evening on Wednesday 10th May, and we can't wait to return to the Telford International Centre to toast the best and brightest young engineering talent in our industry!

### Charity

The Pump Centre is raising much needed financial support for Macmillan Cancer Support at this year's Water Equipment Show annual conference dinner.

Right now, more than 3 million people are living with cancer in the UK. By 2030, this figure will rise to 4 million. The current cancer care provision is approaching a crisis point and existing services are struggling to cope, yet the number of people living with cancer continues to grow.

The Pump Centre will be raising funds for Macmillan Cancer Support via a raffle held during the annual dinner. All the raffle prizes are kindly donated by the companies attending the Water Equipment Show and all the individual dinner guests donate money to enter the raffle.

Over the past few years, the raffle has raised in excess of £40,000 for different causes.

We're proud to be supporting Macmillan this year and we encourage you, if you can, to dig deep for others.

### New kids on the block

The year is already off to a flying start with yet more industry names joining our ranks. Many of these are exhibiting at the Water Equipment Show at the International Centre, Telford on Thursday 11th May.

Again, a large proportion of these are companies well-established in the water industry, whether small local family firms or major global entities.

We're excited to introduce:  
**CP Automation**  
**EagleBurgmann**  
**Marechel Electric**  
**Saveco Environmental**  
**SPM Instrument**  
**Rotorflush**

**stand F64**  
**stand F50**  
**stand F44**  
**stand F35**  
**stand F31**  
**stand F52**

Don't miss out on your opportunity to meet these new members face-to-face at this year's Water Equipment Show - their stand numbers are highlighted above.
